

IVISS User Guide

Welcome to IVISS — Your complete platform for vehicle identification, compliance checks, and field operations management.

Who This Is For

IVISS is designed for:

- **Law enforcement agencies** conducting roadside vehicle inspections and enforcement
- **Government regulatory bodies** managing vehicle compliance and registration
- **Field agents** who need quick, reliable vehicle identification on the go
- **Administrators** who coordinate field operations and manage teams
- **Organizations** responsible for public safety and regulatory compliance

If your work involves checking vehicle status, verifying compliance, or managing field operations, IVISS streamlines these tasks with real-time data and mobile-first tools.

What IVISS Does

IVISS helps you:

- **Identify vehicles instantly** using license plate recognition (scan or manual entry)
 - **Check compliance status** for insurance, customs clearance, technical inspection, and wanted vehicles
 - **Record enforcement actions** like citations, warnings, impounds, and flags
 - **Track all vehicle checks** with complete audit trails including location and timestamps
 - **Manage field teams** with role-based access and device security
 - **Generate reports** on control activities, agent performance, and vehicle statistics
 - **Work offline** with Progressive Web App (PWA) technology that syncs when you're back online
-

Core Features at a Glance

Feature	What It Does
License Plate Recognition	Scan plates with your camera or enter them manually
Real-Time Compliance Checks	Instantly verify insurance, customs, inspection, and wanted status
Control History	Complete record of all vehicle checks with timestamps and locations
Alert System	Immediate notifications for flagged vehicles (stolen, unregistered, etc.)
Mobile-First Design	Optimized for smartphones and tablets used in the field
Progressive Web App (PWA)	Install on any device, works offline, updates automatically
Multi-Organization Support	Separate data and settings for different agencies
Role-Based Access Control	Different permissions for Super Admins, Organization Admins, and Agents
Enforcement Actions	Record citations, impounds, warnings, and flags directly from the field
Report Generation	Export control summaries, agent performance, and statistics in CSV/PDF/Excel
Secure Device Binding	Each agent's device is cryptographically linked to their account
Daily Shift Management	Agents verify their identity each shift with SMS codes

Getting Started: Your First Steps

For Super Administrators

Super Administrators are the top-level system managers who set up organizations and their administrators. If you're a Super Admin, you'll start here. If you're an Organization Admin, skip to the "For Organization Administrators" section.

1. Access the Back-Office

What you need:

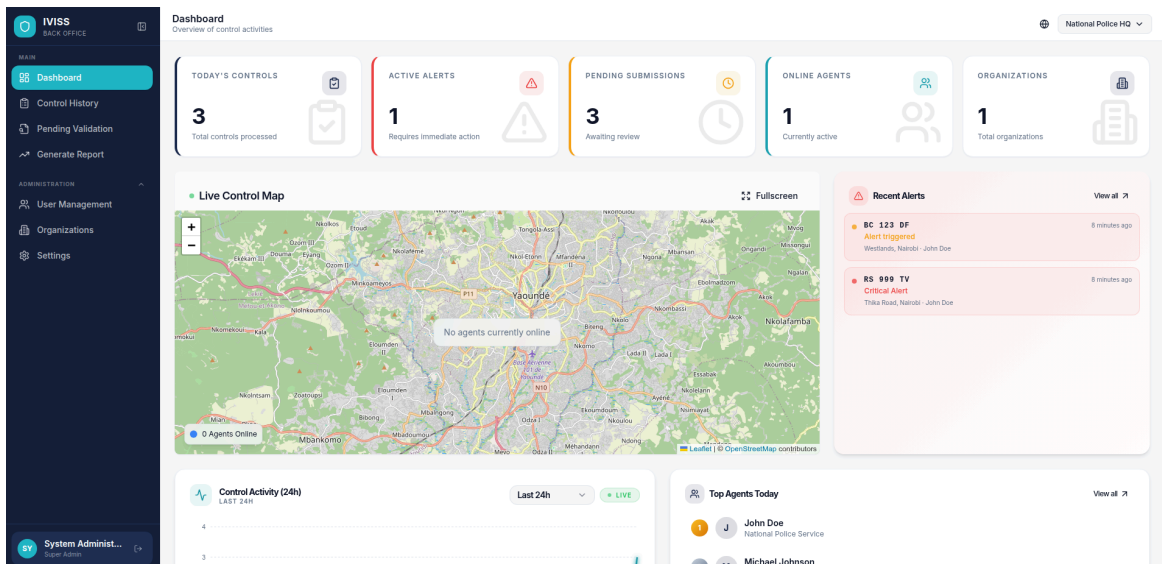

- Your Super Admin login details (email and password)
- A web browser (Chrome, Firefox, Safari, or Edge work best)
- Internet connection

Steps:

1. Open your web browser and navigate to the IVISS back-office URL (provided by your system administrator)
2. Click **Admin Login** on the welcome screen

The screenshot shows the IVISS Back-Office Administration login interface. At the top, there is a shield icon and the text 'IVISS Back-Office Administration'. Below this is the 'Admin Sign In' section, which includes the instruction 'Enter your administrator credentials to access the back-office.' The form has two input fields: 'Email or Username' (containing 'admin@iviss.gov or org_admin') and 'Password' (masked with asterisks). A 'Sign In' button is located below the password field. An annotation 'Enter admin credentials here' with two arrows points to the email and password fields. At the bottom of the form, there is a link 'Agent? Activate your device here' and a security notice: 'Secured government system. Unauthorized access prohibited.'

3. Enter your **email address** and **password**
4. Click **Sign In**
5. You'll be redirected to the **Back-Office Dashboard**

What you'll see:

- Dashboard with system statistics
- Navigation menu on the left with options for Users, Organizations, Controls, Reports, and Settings

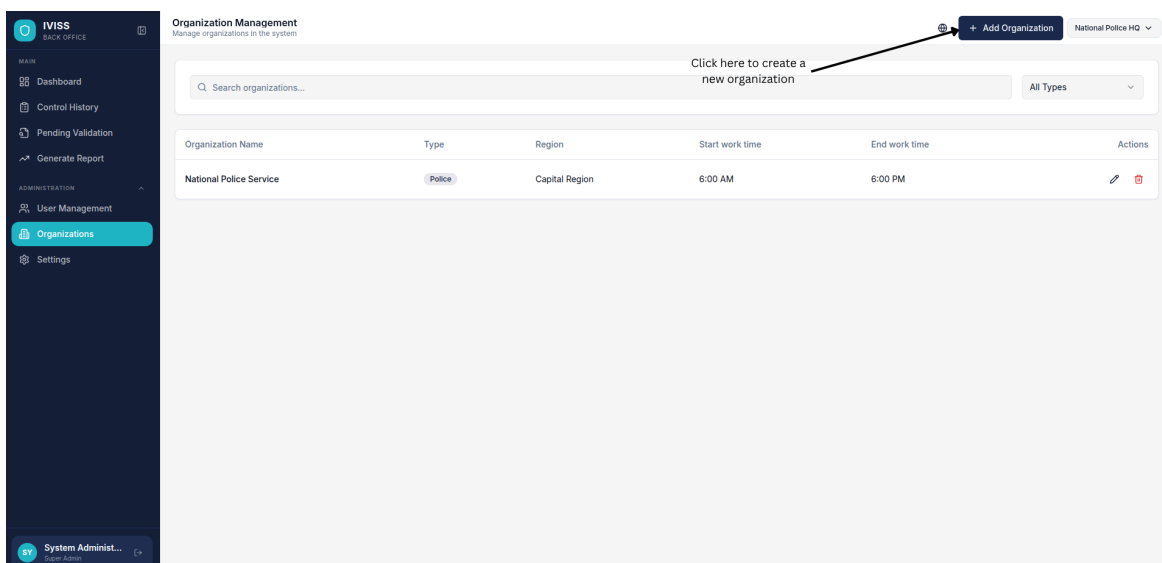

2. Create Your First Organization

What you need:

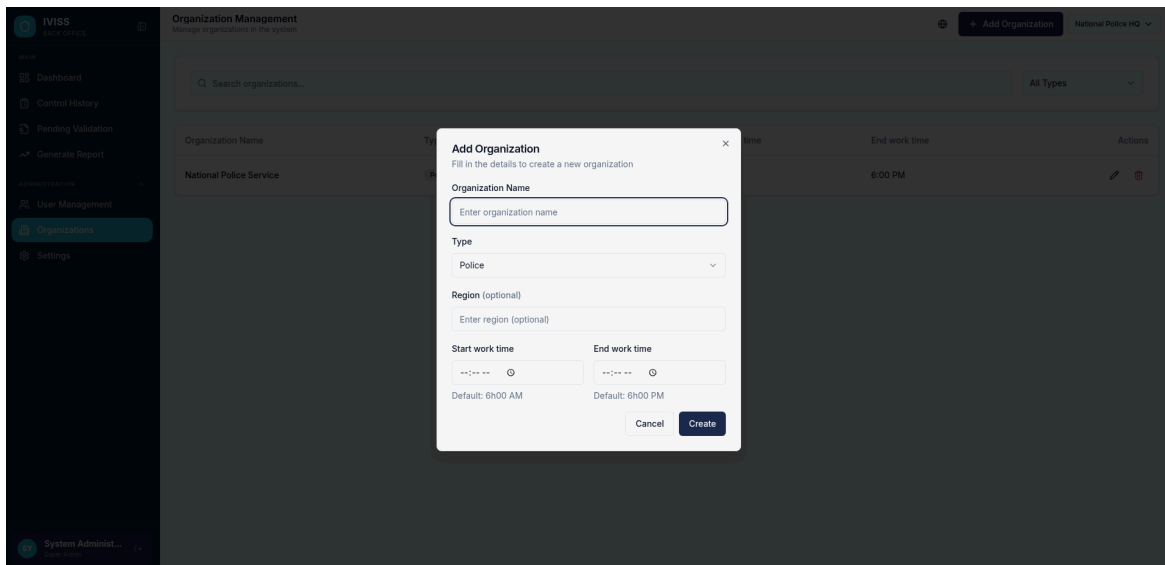

- Super Admin access
- Organization details (name, contact information)

Steps:

1. From the back-office dashboard, click **Organizations** in the left sidebar

2. Click the **Add Organization** button (top right)
3. Fill in the organization details:
 - **Name:** The official name of the agency or department
 - **Type:** Type of organization
 - **Region:** Physical location (optional)
 - **Working hours:** Start and end of work time

4. Click **Create Organization**
5. The new organization appears in your organizations list

What happens next:

- The organization is now active in the system
- You can now create an Organization Admin for this organization
- Each organization's data is kept completely separate from other organizations

3. Create Organization Administrators

Organization Administrators manage their own organization - they create agents, view reports, and handle day-to-day operations. As a Super Admin, you'll create these Organization Admins.

What you need:

- Super Admin access
- Admin user details (email, name)

Steps:

1. Click **Users** in the left sidebar

2. Click **Add User** button

The screenshot shows the IIVISS User Management interface. On the left is a sidebar with navigation options: Dashboard, Control History, Pending Validation, Generate Report, User Management (selected), Organizations, and Settings. The main area is titled 'User Management' with the subtitle 'Manage system users and their permissions'. At the top right, there is a '+ Add User' button highlighted with a red arrow and the text 'Create new users here'. Below this are filters for 'All Roles', 'All Status', and 'All Organizations'. A summary section shows 'Total Users: 8', 'Active Now: 7', 'Supervisors: 2', and 'Organizations: 1'. A table lists users with columns: User, Role, Organization, Status, Terminate Session, Last Active, Controls Today, and Actions. The table contains 8 rows of user data.

User	Role	Organization	Status	Terminate Session	Last Active	Controls Today	Actions
SH Sherlock Holmes	agent	National Police Service	ACTIVE	ACTIVE	Today	0	
JA James Bond	agent	National Police Service	ACTIVE	ACTIVE	Today	0	
OR org admin orgadmin@iviss.com	org_admin	National Police Service	ACTIVE	INACTIVE	Today	0	
OR Organization Admin orgadmin@iviss.local	org_admin	National Police Service	ACTIVE	INACTIVE	Today	0	
JO John Doe	agent	National Police Service	ACTIVE	ACTIVE	Today	0	
MI Michael Johnson	agent	National Police Service	PENDING	INACTIVE	Today	0	
SY System Administrator manager2@iviss.gov	manager	National Police Service	ACTIVE	INACTIVE	Today	0	
JA Jane Smith manager@iviss.gov	manager	National Police Service	ACTIVE	INACTIVE	Today	0	

3. Fill in the user information:

- **Role:** Select **Organization Admin** from the dropdown
- **User Name** and **Full Name**
- **Phone Number:** Org admin's phone number
- **Email:** Org admin's email address (they'll use this to log in)
- **Organization:** Select which organization this admin will manage
- **badge number:** Org admin's badge number

The screenshot shows the IIVISS User Management interface with the 'Add New User' modal open. The modal has a title 'Add New User' and a subtitle 'Fill in the details below to provision a new user account.' It contains the following fields: 'Role' (set to 'Organization Admin'), 'Username', 'Full Name', 'Phone Number' (with a '+237' prefix), 'Email Address', 'Organization' (a dropdown menu), and 'Badge ID'. At the bottom of the modal are 'Cancel' and 'Save User' buttons. The background shows the same user management interface as the previous screenshot, but with a total of 5 users.

4. Click **Save User**

5. The new Organization Admin receives their login details and can now access the system

Important notes:

- Organization Admins can only see and manage users within their own organization

- Super Admins can see and manage all organizations and users
 - Passwords should be changed on first login (see Settings)
-

For Organization Administrators

Organization Administrators manage their agency's daily operations. You'll create field agents, monitor their activity, and generate reports. If you're an Organization Admin, start here.

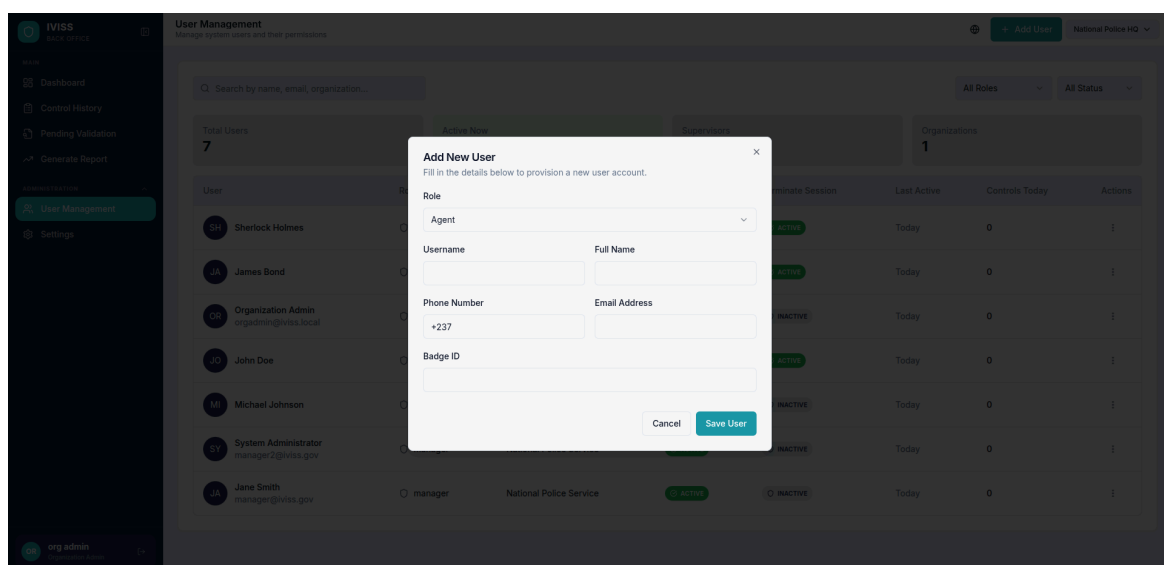

4. Provision Field Agents

What you need:

- Organization Admin access
- Agent details (name, phone number, badge number)
- Agent's mobile device ready

Steps:

1. Click **Users** in the left sidebar
2. Click **Add User** button
3. Fill in the agent information:
 - **Role:** Select **Agent** from the dropdown
 - **User Name** and **Full Name**
 - **Phone Number:** Must be accurate (we'll send a text message to this number)
 - **Email address:** Agent's email address
 - **badge number:** Agent's official identification number

4. Click **Save User**
5. The system creates an **activation code** and sends it by text message to the agent's phone
6. Give the agent instructions to activate their device (see Agent section below)

What happens next:

- Agent receives a text message with their activation code
 - Agent can now activate their device and start working within your organization
 - You can see the agent's activation status in the Users list
-

For Field Agents

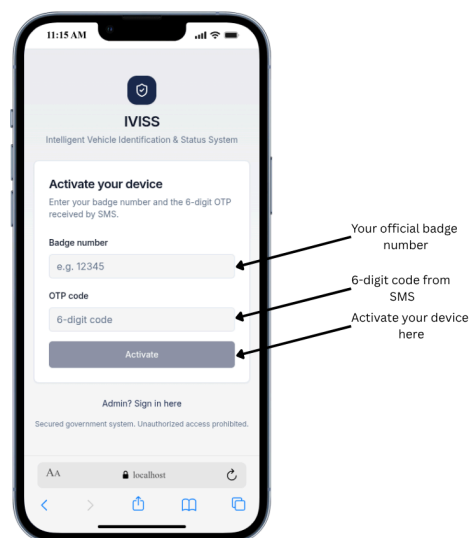

1. Activate Your Device (First Time Only)

What you need:

- Activation code received by text message from your administrator
- Mobile device (smartphone or tablet)
- Internet connection
- Your badge number

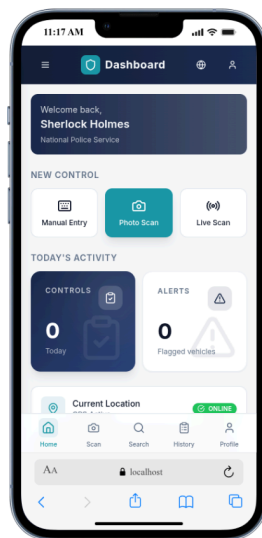

Steps:

1. Open your web browser on your mobile device
2. Go to the IVISS mobile app web address (your administrator will give you this)
3. On the welcome screen, you'll see **Activate Device**

4. Enter your **badge number**

5. Enter the **activation code** from your text message
6. Tap **Activate**
7. Your device is now registered and you're logged in

What happens:

- Your device creates a unique security link to your account
- This link stays permanent and keeps your account secure
- You get access to use the app
- Your device status is set to **ACTIVE**

Important:

- This activation only happens once per device
 - If you clear your browser's saved data, you'll need to activate again
 - Keep your device secure — it's your key to the system
-

2. Daily Login (Start of Each Shift)

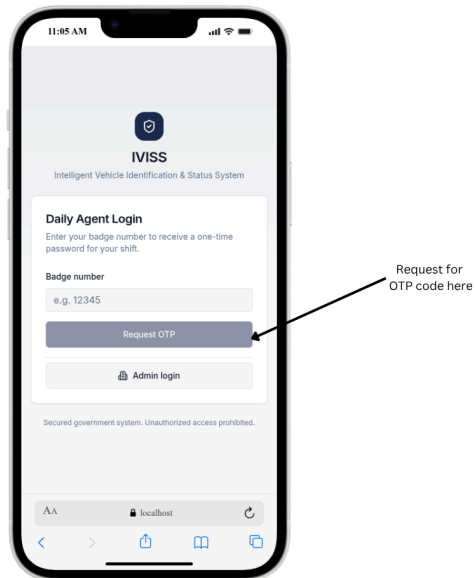

Prerequisites:

- Activated device
- Phone number registered in the system
- Internet connection

Steps:

1. Open the IVISS app on your device
2. If your previous shift has ended, you'll see the **Daily Login** screen
3. Enter your **Badge number**

4. Tap **Request OTP**

5. Wait for the SMS with your daily code (arrives within 1 minute)

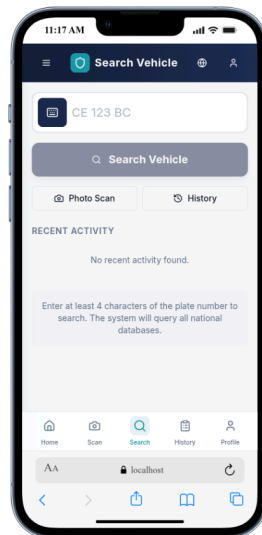

6. Enter the **6-digit code** from the SMS

7. Tap **Verify**

8. You're now logged in for your shift

What you'll see:

- The main vehicle search screen

- Access to all field operations features

Important notes:

- Daily codes expire after 5 minutes

- You can request a new code if the first one expires
 - Maximum 3 code requests per 10 minutes (prevents abuse)
 - Your shift automatically ends at the scheduled time
 - You'll need to log in again for your next shift
-

3. Check a Vehicle

Prerequisites:

- Active shift (logged in)
- Vehicle license plate number

Steps:

Option A: Live Scan Mode (Real-Time Recognition)

1. From the main screen, tap the **Camera** icon
2. Allow camera access if prompted
3. Select **Live** mode at the bottom of the screen
4. Tap **Start Live Scan**
5. Point your camera at the vehicle's license plate
6. Keep the plate centered in the viewfinder frame
7. The app continuously scans and detects the plate automatically
8. When a valid plate is detected, it appears on screen
9. Review the detected plate number
10. Tap **Confirm** to search the vehicle

Best for: Quick checks when the vehicle is stationary and the plate is clearly visible.

Option B: Photo Mode (Single Capture with Quality Check)

1. From the main screen, tap the **Camera** icon
2. Allow camera access if prompted
3. Select **Photo** mode at the bottom of the screen
4. Point your camera at the vehicle's license plate
5. Keep the plate centered in the viewfinder frame
6. Tap the **white capture button** to take a photo
7. The app automatically:
 - Assesses image quality (brightness, blur, contrast)
 - Crops to the viewfinder area for better accuracy
 - Sends the image to the OCR engine
8. Review the detected plate number
9. If needed, tap **Edit** to correct any characters

10. Tap **Confirm** to search the vehicle

Best for: Difficult lighting conditions, moving vehicles, or when you need a single high-quality capture.

Option C: Enter Plate Manually

1. From the main screen, tap the **Plate Number** field
2. Type the license plate number
 - The app automatically formats as you type
 - Converts to uppercase
 - Adds spaces where needed
3. When the plate is valid, the **Search** button activates
4. Tap **Search**

Supported plate formats:

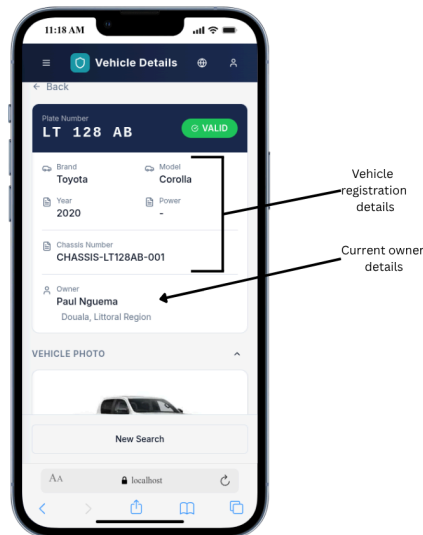

- Standard Regional: CE 1234 A or LT 123 AB
- Police: SN 1234
- Military: 1234567 (7 digits)
- Government: EN1234X
- Postal: RT123456
- Diplomatic: CD 12 345

What happens next:

- The system searches the national vehicle database
 - Compliance checks run automatically (insurance, customs, inspection, wanted status)
 - Results appear within 2-3 seconds
 - A control record is created with your location and timestamp
-

4. Review Vehicle Information

What you'll see after a search:

Vehicle Details:

- License plate number
- Make, model, and year
- Color
- VIN (chassis number)
- Owner information

Compliance Status:

- **Insurance:** Valid/Invalid/Expired with expiry date
- **Customs Clearance:** Cleared/Not Cleared with date
- **Technical Inspection:** Valid/Invalid with next due date
- **Wanted Status:** Flagged/Clear

Status Indicators:

- **Green:** Compliant
- **Yellow:** Warning (expiring soon)
- **Red:** Non-compliant or flagged

Alert Notifications:

- If a vehicle is **wanted** or **stolen**, you'll see a prominent red alert
- If insurance or inspection is **expired**, you'll see a warning
- Follow your organization's procedures for flagged vehicles

5. Record an Enforcement Action

Prerequisites:

- Completed vehicle check
- Reason for enforcement action

Steps:

1. After viewing vehicle details, scroll to **Enforcement Actions**
2. Tap **Add Action**
3. Select the **action type**:
 - **Citation**: Issue a ticket for a violation
 - **Warning**: Verbal or written warning
 - **Impound**: Vehicle seized
 - **Flag**: Mark for follow-up
4. Enter **details** or **notes** about the action
5. Add any **photos** if required (tap Camera icon)
6. Tap **Save Action**

What happens:

- The action is recorded with timestamp and your agent ID
- The action is linked to the control record
- Your administrator can review all actions in the back-office

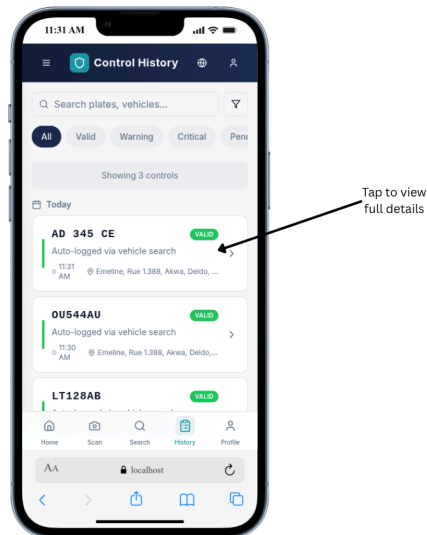

Best practices:

- Be specific in your notes
 - Include relevant details (location, circumstances, driver behavior)
 - Take clear photos if documenting damage or violations
 - Follow your organization's enforcement guidelines
-

6. View Your Control History

Steps:

1. Tap the **Menu** icon (three lines, top left)
2. Select **My Controls Today**
3. You'll see a list of all your vehicle checks

What you can do:

- **Filter** by date range
- **Search** for specific plates
- **View details** of past controls
- **Review** enforcement actions you've taken

Information shown:

- Date and time of each check
- License plate number
- Vehicle make and model
- Compliance status at time of check
- Location where check was performed
- Any enforcement actions taken

For Organization Administrators

Organization Administrators can monitor their team's activity and generate reports from the back-office.

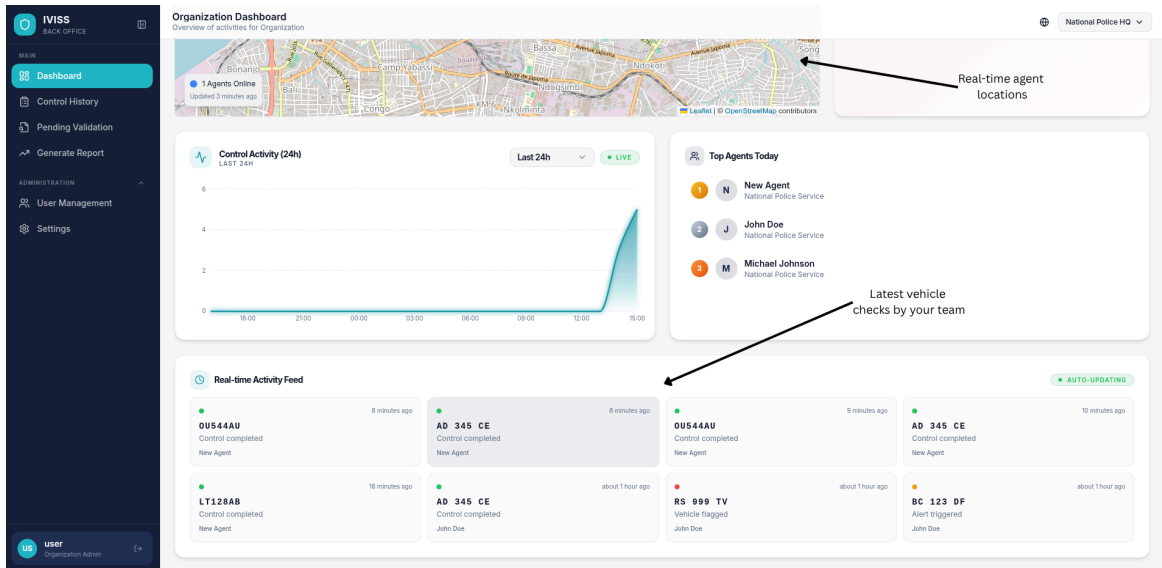

Monitor Agent Activity

What you need:

- Organization Admin access
- Access to back-office

Steps:

1. Log in to the back-office
2. Click **Dashboard** in the left sidebar
3. View the **Control Activity Dashboard**

What you'll see:

- Real-time map of agent locations and recent checks
- List of all controls performed by your team
- Statistics on checks per agent
- Compliance violation trends
- Enforcement actions taken

Filtering options:

- By date range
- By specific agent
- By vehicle status (compliant/non-compliant)
- By enforcement action type

Common Workflows

Workflow 1: Morning Shift Start

For Agents:

1. Arrive at your station or patrol area
2. Open the IVISS app on your device
3. Request your daily login code

4. Check your phone for the SMS code
5. Enter the code to start your shift
6. Begin patrol and vehicle checks

Time required: 2-3 minutes

Workflow 2: Roadside Vehicle Check

For Agents:

1. Pull over a vehicle for inspection
2. Open IVISS app (already logged in)
3. Scan the license plate or enter it manually
4. Wait 2-3 seconds for results
5. Review vehicle details and compliance status
6. Check for alerts (wanted, stolen, expired documents)
7. If non-compliant, record an enforcement action
8. If compliant, inform the driver and let them proceed
9. Move to next vehicle

Time required: 1-2 minutes per vehicle

Workflow 3: Handling a Flagged Vehicle

For Agents:

1. Search for the vehicle (scan or manual entry)
2. See **RED ALERT** for wanted/stolen status
3. **Do not approach alone** — follow safety protocols
4. Call for backup if required
5. Record the sighting with location details
6. Take photos if safe to do so
7. Follow your organization's procedures for wanted vehicles
8. Complete the control record with detailed notes

Important: Your safety comes first. Never put yourself at risk.

Workflow 4: End of Shift

For Agents:

1. Complete your final vehicle checks
2. Return to your station
3. The app automatically logs you out at shift end time
4. Review any pending actions or reports
5. Close the app
6. Your device returns to standby mode

For Organization Administrators:

1. Review the day's control activity
 2. Check for any flagged vehicles or issues
 3. Generate daily summary report
 4. Follow up on any enforcement actions
 5. Prepare briefing for next shift
-

Workflow 5: Adding a New Agent

For Organization Admins:

1. Collect agent information (name, phone, badge number)
2. Log in to back-office
3. Navigate to Users Add User
4. Enter agent details and create account
5. System sends activation code via text message
6. Provide agent with device activation instructions
7. Verify agent successfully activates their device
8. Brief agent on procedures and expectations

Time required: 5-10 minutes

Troubleshooting Common Issues

Issue: "Activation code not received"

Possible causes:

- Wrong phone number entered
- SMS delay from carrier
- Phone has no signal

Solutions:

1. Verify the phone number is correct
 2. Wait 2-3 minutes for SMS delivery
 3. Check phone signal strength
 4. Request a new code (wait 10 minutes between requests)
 5. Contact your administrator if problem persists
-

Issue: "Invalid activation code"

Possible causes:

- Code expired (5 minutes)
- Code already used
- Typo in code entry

Solutions:

1. Request a new code
 2. Enter the code carefully (6 digits)
 3. Use the most recent code received
 4. Contact your administrator if problem continues
-

Issue: "Device suspended"

Possible causes:

- Administrator suspended your device
- Security concern
- Device reported lost or stolen

Solutions:

1. Contact your administrator immediately
 2. Do not attempt to bypass the suspension
 3. Wait for administrator to restore access
 4. You may need to re-activate your device
-

Issue: "Cannot scan license plate"

Possible causes:

- Poor lighting conditions

- Dirty or damaged plate
- Camera not focused
- Plate format not recognized
- Image quality too low (blurry, too dark, too bright)

Solutions:

1. **Switch to Photo Mode** — provides quality feedback and better accuracy
 2. Ensure good lighting (use flashlight if needed)
 3. Clean the plate if dirty
 4. Hold camera steady and wait for focus
 5. In Photo Mode, follow the quality feedback messages:
 - “Image too blurry” Hold camera steadier
 - “Image too dark” Add more light or move closer
 - “Image too bright” Reduce direct sunlight or adjust angle
 6. Try manual entry instead
 7. Ensure plate is in a supported format
-

Issue: “Vehicle not found”

Possible causes:

- Vehicle not registered in national database
- Plate number entered incorrectly
- New vehicle not yet in system
- Foreign vehicle

Solutions:

1. Verify plate number is correct
 2. Try re-entering or re-scanning
 3. Check if plate format is valid
 4. For unregistered vehicles, follow your organization’s procedures
 5. Record the incident in your notes
-

Issue: “Compliance status shows ‘Unknown’”

Possible causes:

- Partner API temporarily unavailable
- Network timeout
- Vehicle data incomplete

Solutions:

1. Wait 30 seconds and search again
 2. Check your internet connection
 3. Note the unknown status in your report
 4. Follow up later or use alternative verification methods
 5. Report persistent issues to your administrator
-

Security Best Practices

For All Users

1. **Never share your credentials** with anyone
2. **Log out** when not using the system
3. **Report suspicious activity** immediately
4. **Keep your device secure** — use screen lock
5. **Don't write down passwords** — use a password manager
6. **Change your password** if you suspect it's been compromised
7. **Be aware of phishing** — verify URLs before entering credentials

For Agents

1. **Keep your device with you** at all times during shift
2. **Don't let others use your device** for IVISS
3. **Report lost or stolen devices** immediately
4. **Clear browser data** if device is compromised
5. **Use strong device lock** (PIN, fingerprint, face ID)
6. **Don't share activation codes** or daily login codes
7. **Log out** if leaving device unattended

For Administrators

1. **Review user access** regularly
 2. **Suspend inactive accounts** promptly
 3. **Monitor for unusual activity** in audit logs
 4. **Use strong passwords** for admin accounts
 5. **Enable two-factor authentication** if available
 6. **Limit admin privileges** to necessary users only
 7. **Keep contact information** up to date for all users
-

Understanding Roles and Permissions

Super Admin

Who they are: System-wide administrators who set up and manage the entire IVISS platform.

Can do:

- Create and manage all organizations
- Create and manage Organization Admins for each organization
- View all system data and audit logs across all organizations
- Configure system-wide settings
- Access all reports and analytics from any organization
- Suspend or restore any user or device

Cannot do:

- Perform field operations (agent functions)

Typical users: System administrators, IT staff, platform managers

Organization Admin

Who they are: Administrators who manage a single organization's daily operations.

Can do:

- Manage users within their organization only
- Create and assign field agents
- View their organization's data and reports
- Configure their organization's settings
- Suspend or restore users and devices in their organization
- Generate reports for their organization
- Monitor agent activity and performance

Cannot do:

- Access other organizations' data
- Create or modify organizations
- Perform field operations (agent functions)
- Change system-wide settings
- See or manage users from other organizations

Typical users: Department heads, operations managers, agency administrators

Agent

Who they are: Field officers who perform vehicle checks and enforcement actions.

Can do:

- Perform vehicle checks (scan or manual entry)
- View vehicle details and compliance status
- Record enforcement actions
- View their own control history
- Update their profile and password

Cannot do:

- View other agents' activity
- Access back-office administration
- Create or manage users
- Generate system reports
- Change organization settings

Typical users: Field officers, patrol agents, enforcement officers

System Requirements

For Mobile Agents

Device:

- Smartphone or tablet
- Android 8.0+ or iOS 12.0+
- Camera (for plate scanning)
- GPS (for location tracking)

Browser:

- Chrome 90+
- Safari 14+
- Firefox 88+
- Edge 90+

Network:

- 3G/4G/5G or WiFi connection
- Minimum 1 Mbps download speed

Storage:

- 50 MB free space for app data
 - Additional space for photos (if taking enforcement photos)
-

For Back-Office Users

Device:

- Desktop computer, laptop, or tablet
- Windows 10+, macOS 10.14+, or Linux

Browser:

- Chrome 90+ (recommended)
- Firefox 88+
- Safari 14+
- Edge 90+

Network:

- Broadband internet connection
- Minimum 5 Mbps download speed (for reports and dashboards)

Display:

- Minimum 1280x720 resolution
 - 1920x1080 or higher recommended
-

Getting Help

Contact Your Administrator

For issues with:

- Account access or passwords
- Device activation or suspension
- User permissions or roles

- Organization settings

Contact your organization's IVISS administrator.

Technical Support

For technical issues:

- System errors or bugs
- Performance problems
- Feature requests
- Integration questions

Contact IVISS technical support (contact information provided by your system administrator).

Frequently Asked Questions

Q: How long does device activation take?

A: 2-3 minutes once you receive your activation code.

Q: Can I use IVISS on multiple devices?

A: Each device must be activated separately. Contact your administrator to register additional devices.

Q: What happens if I lose my device?

A: Report it to your administrator immediately. They will suspend the device to prevent unauthorized access.

Q: Can I work offline?

A: IVISS is a Progressive Web App with limited offline capabilities. You can view previously loaded data, but vehicle searches require an internet connection.

Q: How long do daily login codes last?

A: 5 minutes. Request a new code if yours expires.

Q: Can I change my shift hours?

A: Contact your administrator to adjust shift times.

Q: What's the difference between Live Scan and Photo Mode?

A: Live Scan continuously detects plates in real-time, while Photo Mode captures a single high-quality image with quality checks and allows you to edit the result before searching.

Q: Why does Photo Mode reject my image?

A: Photo Mode includes quality checks for blur, brightness, and contrast. Follow the feedback messages to improve image quality (add light, hold steady, adjust angle).

Q: Can I edit a detected plate number?

A: Yes, in Photo Mode you can tap **Edit** to manually correct any misread characters before confirming the search.

Q: What if a vehicle has multiple compliance issues?

A: Record all issues in your enforcement action notes. You can add multiple actions to a single control record.

Q: How do I update my profile information?

A: Go to Settings Profile in the app or back-office.

Q: Can I delete a control record?

A: No. All control records are permanent for record-keeping purposes. Contact your administrator if you need to add corrections or notes.

Q: How far back can I view my control history?

A: All your controls are available indefinitely. Use date filters to find specific records.

Glossary

Term	Definition
Agent	A field user who performs vehicle checks and enforcement actions.
Activation Code	A one-time code sent by text message to register a new device.
Back-Office	The web-based administrative interface for administrators.
Compliance Status	Whether a vehicle meets requirements for insurance, customs, inspection, etc.
Control	A vehicle check or inspection performed by an agent.
Control Record	The complete documentation of a vehicle check, including timestamp, location, and results.
Daily Login	The text message-based verification required at the start of each shift.

Device Binding	The secure link between an agent's account and their physical device.
Enforcement Action	A recorded action taken against a vehicle (citation, warning, impound, flag).
Multi-Tenant	System design that keeps each organization's data completely separate.
Organization Admin	Administrator who manages a single organization's operations and users.
OTP	One-Time Password — a temporary code sent by text message for login.
PWA	Progressive Web App — a web application that works like a native app with offline support.
RBAC	Role-Based Access Control — permissions system based on user roles.
Shift	The time period during which an agent is logged in and authorized to work.
Super Admin	System-wide administrator with access to all organizations.
Wanted Status	Indicates if a vehicle is reported stolen or flagged by authorities.
